

Business Grade ADSL with Guaranteed Bandwidth

Intouch Advance offer 'Always On' connectivity across a multi million pound, fully resilient network that is owned and operated by one of the UK's leading broadband suppliers.

We offer broadband solutions for both office and home worker use which is supported by a dedicated team.

Guaranteed ADSL Bandwidth

ADSL circuits are usually contended at the local exchange which means you share your circuit with many other customers.

Typically business broadband is contended at 20:1, whilst home services are usually contended at 50:1. This means that your ADSL circuit is shared with up to 20 or 50 other users which can result in you achieving a guaranteed bandwidth of just 5% for 20:1 services and just 2% for 50:1 services.

The Intouch Advance service offers far lower contention ratios and guarantees that more bandwidth is available for your use.

Contention on circuits 2mb and below:

Our Business Broadband offers contention of only 2^{1/2}:1 which guarantees that at least 40% of the circuit bandwidth is available to you.

Our Home Broadband offers only 5:1 contention which guarantees that at least 20% of the circuit bandwidth is available to you.

Contention on Max Circuits

ADSL Max circuits are typically available with 20:1 and 50:1 contentions. However our Max services also offer enhanced contention.

Our Business MAX ADSL offers contention of only 10:1 which guarantees that at least 10% of the circuit bandwidth is available to you.

Business Broadband offers 20:1 contention which guarantees that at least 20% of the circuit bandwidth is available to you.

ADSL Pricing

Our prices for a fully managed service are as follows. Routers are sold separately.

Business Service	Monthly Rental
• Business 256k/512k	£ 28.00
• Business 256k/1mb	£ 30.00
• Business 256k/2mb	£ 32.00
• Business MAX up to 8mb	£ 48.00
• Activation Charge	£ 50.00

Homeworker Service	Monthly Rental
• Home 256k/512k	£ 22.00
• Home 256k/1mb	£ 23.50
• Home 256k/2mb	£ 25.00
• Home MAX up to 8mb	£ 28.00
• Activation Charge	£ 50.00

SDSL Pricing

We also offer SDSL services that are contended at 10:1 and offer synchronous bandwidth capacity for both up and down load speeds. For full SDSL details please see the SDSL factsheet.

SDSL Service	Monthly Rental
• SDSL 512k/512k	£ 179.00
• SDSL 1mb/1mb	£ 199.00
• SDSL 2mb/2mb	£ 239.00
• Activation Charge	£ 350.00

The above pricing excludes routers. Please see router spec and pricing below.

The following Routers are available to maximise your Intouch Advance broadband service.

Microfilter £2.50

ZyXEL Prestige 630-S1 £29.99

- ADSL USB modem
- Multimode
- 1 USB port
- Supports PPPoE, RFC and bridge mode
- Drivers for Win98, ME, 2000, XP, MacOS
- Supports up to 8Mbps downstream and 1024Kbps upstream
- Easy to install
- Easy to deploy

ZyXEL Prestige 660R Compact £35.00

- 1x10/100 ADSL router
- Easy to install - zero configuration
- Compact unit for more desk space
- Compatible with ADSL, ADSL2, ADSL2+
- Suitable for home workers and SMEs
- 1 x ADSL port with on/off button and status LEDs
- Universal plug and play

ZyXEL Prestige 660H £60.00

- 4 x 10/100 ethernet router
- Compatible with ADSL, ADSL2 and ADSL2+
- Ideal for home workers and SMEs
- Easy to use
- Easy to install—zero configuration
- Traffic re-direct
- MBM (Media Bandwidth Management)
- Remote configuration

ZYXEL Prestige 660HW Wireless Router £99.00

- ADSL 4 x 10/100 ethernet router
- Built-in 54Mbps wireless access point
- Ideal for home workers and SMEs
- Easy to use and install - zero configuration
- Compatible with ADSL, ADSL2 and ADSL2+ speeds of up to 12Mbps (ADSL2) or 24Mbps (ADSL2+)
- Integrated firewall with advanced SPI (Stateful Packet Inspection)
- Wireless compatibility 802.11g 54Mbps and 802.11b 11Mbps
- G+ SuperSpeed technology
- MBM (Media Bandwidth Management) to tailor the system to specific demands such as VoIP, video streaming, video-conferencing and MP3 applications
- Remotely configurable via SNMP, Web, TFTP

ZyXEL Prestige 62HW Wireless Firewall VPN £149.00

- VPN firewall compatible with ADSL, ADSL2, ADSL2+
- Anti-virus engine built in to router
- Maximum flexibility, 4 x 10/100 ethernet, 2 x phone, 1 x serial and 1 x ADSL port
- 802.11g and g wireless compatible
- Up to 125Mbps using 802.11g+ with ZyXEL G-162 card
- Full Stateful packet inspection (SPI) firewall and hardware-accelerated VPN termination up to 30 tunnels and 1 x configurable DMZ port
- Dial backup, traffic redirect and media bandwidth management
- Easy to install and manage via web interface zero configuration
- High performance ADSL security wireless router
- Integrated anti-virus engine
- Embedded high performance SPI Firewall with 1 x DMZ port hardware-accelerated VPN termination for up to 30 tunnels
- Up to 125Mbps wireless using 802.11g+ mode dial-backup through external serial port for ISDN TA/modem remote management
- 4-port Ethernet 10/100Mbps switch
- Easy to install and use zero configuration
