

Intouch Advance Meeting Centre

ON DEMAND MULTIMEDIA CONFERENCING

Accomplish more in your workday with Intouch Advance Meeting Centre. Meet with colleagues, clients and customers from remote locations in your own multimedia virtual meeting room, without ever leaving your office. Intouch Advance Meeting Centre fully integrates audio, web and desktop video conferencing into one intuitive interface, using patented technology to ensure that audio and web are completely synchronized. Manage your meetings with simple "point" and "click" commands.
All you need is a computer, Internet connectivity and a telephone or headset with a microphone.

Exciting new features and enhancements include:

NEW CUSTOMIZABLE USER INTERFACE

- Basic and Advanced Views provide you with the ability to toggle between a simplified interface or one that includes a more advanced feature set
- Configurable meeting interface options provides users with more flexibility
- Quick Start menus guide first-time users on how to start or join a meeting

SLIDE PREVIEW

Preview your PowerPoint™ Presentation slides before revealing them to the audience.

ANNOTATE OVER ALL MEETING CONTENT

New annotation tools can be used when showing slides and sharing applications.

IN-MEETING INVITE

Easily invite your participants while in a meeting with a simple click of a button.

DESKTOP VoIP

Intouch Advance Desktop VoIP is a secure, low-bandwidth and firewall-friendly solution that uses Voice over Internet Protocol to connect moderators and participants to the audio portion of an online meeting. All you need is an Internet connection and headset with a microphone connected to your computer - and you're ready to meet!

APPLICATION SHARING ENHANCEMENTS

Application Sharing has been enhanced for faster transitions while using less bandwidth.

MEETING LAUNCHER ENHANCEMENTS

Now includes Start and Join Meeting Alerts and Participant Join capability.

PARTICIPANT REGISTRATION

Require participants to pre-register for meetings via email invitations or a public calendar.

MULTIPLE AUDIO BREAK OUT ROOMS

Gather and meet with your participants in different audio sub-conference rooms.

ENHANCED PARTICIPANT BROWSER & OPERATING SYSTEM SUPPORT

Participants can join meetings via numerous browsers and operating systems including:

- IE 6.0 + (Windows)
- Firefox 1.5 + (Windows/Mac/Linux)
- Safari 2.0 + (Mac)
